

Addendum B - Limits and Scope-Triggered Coverages

Source: *Service Provider Agreement Insurance Requirements Addendum B + Sample COI* (attached sample still uses the 2026 Description of Operations block).

Use this file with `vixxo-requirements.md`. Endorsement form numbers stay in `endorsement-equivalents.md`. This file is the dollar-minimum and extra-line overlay the prior COI skill did not encode.

Company may require additional types or higher limits on a specific Service Request when a Vixxo customer requires it.

Always required (every SP)

Line	Addendum B minimum	Review notes
Workers' Compensation	Statutory	Indicate WC statutory limits on the COI.
WC extensions	Voluntary Compensation; All States	Often not printed on ACORD 25. If missing, mark **Needs clarification** and ask the broker to confirm on the certificate or an attached endorsement.
Employers' Liability	**\$500,000 / \$500,000 / \$500,000**	Each Accident / Disease-Each Employee / Disease-Policy Limit.
Commercial General Liability	**\$1,000,000** per occurrence; **\$2,000,000** general aggregate	Occurrence form, **2013 ISO or equivalent** . Must include Premises/Operations, Products, Completed Operations, Broad Form Property Damage, and Contractual Liability.
Commercial Automobile Liability	**\$1,000,000** Combined Single Limit	AI required on Auto as well as GL.
Carrier financial strength	A.M. Best **A IX** or better	Rarely printed on the COI. Look up the named insurer; if unrated or below A IX, mark **Deficient** .
Additional Insured	Company, its customers, the owner, operator, and if required mortgagee of any site ("Insurance Beneficiaries") on **CGL and Auto**	Certificate practice still uses the **full Sample COI party list** (subsidiaries, affiliates, officers, officials, employees, volunteers). A short "Vixxo Corporation is AI" is not enough.
Waiver of subrogation	In favor of Company	Addendum: *all such insurance* . Sample COI still names GL, Auto, and WC/EL - require those three on every review; if Professional or Pollution applies, also require WOS on those lines or mark **Needs clarification** .
Primary	Primary to any other coverage available to Company or any Insurance Beneficiary	Addendum: *all insurance required hereunder* . Sample COI still only prints GL primary. Require GL primary on every COI; if extra lines apply, ask for primary wording on those policies too.
Notice	30 days prior written notice of cancellation **or material change**	Sample COI only says 30 days' notice of cancellation. Treat missing "material change" as **Needs clarification** , not an automatic fail, unless the operator wants a hard fail.
Certificate Holder	Vixxo Corporation, 7580 N. Dobson Road, Suite 201, Scottsdale, AZ 85256	Unchanged.

Umbrella / Excess is still acceptable to reach a required GL or Auto total. It is not a substitute for a missing required extra line (E&O or Pollution).

Scope-triggered GL limit upgrades

Start with \$1M / \$2M. Upgrade when the provider's scope of work (website, licenses, VixxoLink LOS, Case/Lead notes, or operator-stated trade) matches a row below. If both VT rows could apply, use the higher limit.

Trigger	Required CGL
Vertical Transportation work (elevators, escalators, lifts, or other VT equipment - install, modernize, repair, maintain, or inspect)	**\$2,000,000** per occurrence and **\$4,000,000** general aggregate
Same VT services **at or in high pedestrian-traffic, publicly accessible premises** - including airports, shopping centers and malls, transit hubs, and similar facilities	**\$5,000,000** per occurrence and **\$5,000,000** general aggregate

If scope is unclear (provider markets "elevator" or "lift" but Vixxo work is only general facilities), mark Needs clarification and do not accept the base \$1M / \$2M as sufficient until the operator confirms the trade.

Scope-triggered extra policies

These lines are not on the Sample COI ACORD skeleton. Require them when scope matches. Absence is Missing, not optional.

Professional Liability (Errors & Omissions)

- * When: Architects and engineers (design, stamped drawings, PE/RA services, consulting engineering, architecture).
- * Limit: \$1,000,000 Combined Single Limit (minimum).
- * Form: Usually claims-made. If claims-made, record retroactive date; flag a retro date after the relationship start as Needs clarification.
- * Do not treat as E&O: routine trade install/repair with no design professional role (HVAC tech, electrician, plumber) unless the operator or customer SOW says design/engineering is in scope.

Contractor's Pollution Liability (or equivalent)

- * When: Pollution-related operations, including without limitation waste removal, transportation, and hauling. Also apply for hazmat, environmental cleanup, tank work, asbestos/lead/mold abatement, medical or regulated waste, or similar.
- * Limit: \$3,000,000 per occurrence and \$3,000,000 general aggregate.
- * Must cover: third-party bodily injury, property damage, and cleanup/remediation arising from pollution conditions from the vendor's operations, including loading, unloading, transportation, and disposal of waste.
- * Form: CPL is often claims-made even though Addendum B uses occurrence/aggregate wording. Accept claims-made CPL at the same limits if the coverage grant matches; record retro date. If transportation/disposal is excluded, mark Deficient.

Scope classification shortcuts

Classify from the provider's stated services before scoring the COI. Use the first matching rule; a provider can trigger more than one extra line.

If the provider's work includes?	Also require
Architecture, engineering, PE/RA design, stamped plans	Professional Liability \$1M
Waste removal, hauling, disposal, environmental / hazmat / abatement	Pollution \$3M / \$3M
Elevators, escalators, lifts, vertical transportation	CGL \$2M / \$4M (or \$5M / \$5M if public high-traffic sites)
Typical FM trades (HVAC, electrical, plumbing, doors, signage, janitorial, landscaping) with no design or waste scope	Base CGL \$1M / \$2M + Auto \$1M + WC/EL \$500k only

When vetting a company without a COI in hand, still record which extra lines will be required so onboarding and COI review ask for the right policies.

What the three 2026 SOP PDFs do ****not**** need (yet)

`Vixxo COI Endorsement Equivalents 2026`, `Vixxo COI State Law Analysis 2026`, and `Vixxo COI State Law Quick Reference 2026` still correctly cover AI / PNC / WOS / NOC and state WC-waiver constraints. They do not list E&O or Pollution ISO forms. Do not treat those SOP PDFs as the limit source - Addendum B is. Rebuild the Desktop SOP PDFs only after Legal/Risk names preferred E&O or CPL endorsement forms.
